SKILLS

- HTML5
- CSS3
- Bootstrap
- APIs

- JavaScript
- JQuery
- Node.js
- React.js

PROJECTS

SUNSHINE, 2 SERVER-SIDE API'S + FOUNDATION CSS.

The Sunshine Application allows social enthusiasts to find places to go in any city no matter what the weather. Coordinated a team of three developers and utilized AGILE development strategies.
GitHub Repo: https://github.com/YellowYam/Sunshine

WEATHER DASHBOARD, OPENWEATHER API + CUSTOM CSS

A simple web app that fetches third-party API's to generate weather data for any city. It has an intuitive UI and uses jQuery for dynamic page elements.
GitHub Repo: https://github.com/YellowYam/weather-dashboard

CODE QUIZ, COOPERATIVE ASYCNCHRONOUS JAVASCRIPT

Allows the user to practice coding interview skills. Presents the user with a code quiz that generates questions about JavaScript concepts. The application records scores locally on the user's machine.
